

PHASE IV DEBRIS REMOVAL SURVEY
Preliminary Environmental Unit Review

Waterway: Natalbany River, 7104

NOAA reviewer: Jessica White *JW*

Date: 5/5/2008

Checklist of Environmental Factors – Assess the potential for impacts to the following resources/areas and coordinate as necessary:

- ☐ Habitat/environmental sensitivity
- ☒ Threatened/endangered species *A threatened fish may be present. Avoid impacts to shoreline and water bottom (sediments).*
- ☐ Cultural/historical resources
- ☐ Oyster habitat
- ☐ State/federal/tribal lands
- ☐ Scenic waterway

Summary and Conclusions of Environmental Review:

Habitat/environmental sensitivity: Lake is surrounded by forested wetland/bottom land hardwood. Limit activities to open water to avoid shoreline impacts.

Threatened/endangered species: A threatened fish may be present near the confluence of the Tickfaw and Natalbany rivers. Avoid impacts to this fish by prohibiting disturbance to shoreline or water bottom.

Cultural/historical resources: No known resources at this time.

Oyster habitat: None present in river.

State/federal/tribal lands: None appear in the survey area.

Scenic waterway: Not a scenic waterway.
